Elephants are big animals, really big. An adult elephant is usually as big as six cars. The biggest world's elephants are from Africa. In Asia elephants are usually smaller. In America and in Europe you can see elephants only in the zoo.

Elephants have grey bodies, strong legs, and large ears. In fact, the elephant's ears are so big because they help to control the animal's temperature. On hot days elephants spray water on their ears. Then they move them to make the air round them a little colder.

The elephant's long nose is called 'trunk'. The elephant uses the trunk to take food and other things. The elephant's favourite food is grass, leaves and fruit.

Elephants are afraid of lions and tigers because they are large. There is also a story that elephants are afraid of mice. This is not true. But elephants are afraid of small bees because they get into the elephant's trunk and bite.
